

### ***Good Lookin Cookin - Allergen Information***

As you are probably aware on the 13<sup>th</sup> December 2014 it became a legal requirement for food businesses to provide information to their customers about food allergens.

The fourteen allergens which the Food standards agency has regulated are as follows:-

Celery	Cereals containing Gluten	Crustaceans	Eggs
Fish	Lupin	Milk	Molluscs
Mustard	Nuts	Peanuts	Sesame seeds
Soya	Sulphur dioxide (sulphites)		

We are providing each school with the following information so they are aware of our policy towards allergens.

1. All our menu's with any allergens are on our web site so that parents can access the relevant information.
2. We will always have at least one member of staff available to be able to give any allergen advice regarding our food.
3. If you have a child at school with any allergies who is going to eat with us we ask if the parent can initially contact us direct where we can receive information regarding the allergen. The child will be added to our special diet list so that we are fully aware. The parent can then order online as normal but just tick the special diet box when registering the child.
4. All allergen food will be clearly labelled.
5. If we have to change a product and the allergen advice differs we will provide that information to the school.

I hope this answers any queries you may have but if you need any further information then please contact us direct.
